

PANTONMA

— MICRO —

OBSTACLE AVOIDANCE MODULE

The obstacle avoidance sensor will work in all direction.

When it senses that there has obstacle within 50-80CM, the drone will not keep approaching, and it will fly back, which is a double protection for player and people surrounded.

YOUR FLYING COMPANION BEGINNER'S FAVORITE: MORE STABLE AND MICRO PORTABLE SIZE FOR EASIER CONTROL

1. Flashing LED

Soft flashing LED for better visibility.

2. Reinforced Structure

Robust and flexible central body with reinforced single arms.

3. Flexible Propellers

Designed with safety in mind: 4 flexible propellers will all lock if one propeller stuck.

4. Modular Design

Modular design for increased ease of maintenance.

IMPROVED FLIGHT PERFORMANCE

TOTAL CONTROL AT YOUR FINGERTIPS

FEATURES

EASY TO REPLACE MOTOR

Newest motor shield structure makes the replacement of motor becomes very simple. Just unscrew 3 screws to replace motor.

ROTOR DESIGN

The newest 13.5 inch quick release rotors are built with the unique design. They have been enforced with new carbon fiber compound material to ensure excellent performance with increased stability.

SHOCKPROOF GEAR PAD

Worked with Automatic Landing function, makes the Landing Process perfectly.

TOUCH POWER BUTTON

As aircraft with touch buttons ,it is more aesthetic,safe, and easy to operate.

6 Axis Gyroscope

360° Flips Rolls

CF Mode

Auto Hover

Obstacle Avoidance

HD Camera

2.4Ghz R/C

One Press Automatic Return

**WIDE RANGE OF ACCESSORIES
FOR ALL YOUR NEEDS**

BATTERY MODULE

Newest design of battery module, with 380mAh capacitance.

OBSTACLE AVOIDANCE

Obstacle avoidance sensor with strong auto avoid system, a double protection for player.

SPECIFICATIONS :

App

PANTONMA app compatible with smartphones and tablets running on iOS, Android.

Range

Up to 40 meters

Connectivity

Long-range 2.4 GHz spread spectrum transmitter

Design

Plastic structure with specific design for robustness

Stability

Provided by data fusion of an obstacle avoidance sensor and a 6-axis gyroscope, an adjustable camera and a pressure sensor

Battery

380mAh Lithium-Polymer and removable for Aircraft

Lasts up to 6.5 mins (6 mins with camera) and full recharge in 60 mins

Indicators

Bicolor LEDs indicate the status of your PANTONMA Drone

Weight

Aprx 56g(Standard version)

Dimensions

12.1X12.1X4cm without shields

19.5X19.5X4cm with shields

Propellers' diameter: 86mm
